Introduction

This guide shows you how to make the cable connections to set up your MultiVOIP[®] MVP130 or MVP130-FXS unit. See your MultiVOIP *User Guide* included on the MultiVOIP CD for more information.

Safety Warnings

Lithium Battery Caution

A lithium battery on the voice/fax channel board provides backup power for the timekeeping capability. The battery has an estimated life expectancy of ten years.

When the battery starts to weaken, the date and time may be incorrect. If the battery fails, the board must be sent back to Multi-Tech Systems for battery replacement.

Warning: There is danger of explosion if the battery is incorrectly replaced.

Ethernet Ports Caution

Caution: The Ethernet ports and command ports are not designed to be connected to a Public Telecommunication network.

Safety Warnings Telecom

- Use this product only with UL- and CUL-listed computers (US).
- Never install phone wiring during a lightning storm.
- Never install a phone jack in a wet location unless the jack is specifically designed for wet locations.
- Never touch uninsulated phone wires or terminals unless the phone line has been disconnected at the network interface.
- Use caution when installing or modifying phone lines.
- Avoid using a phone during an electrical storm; there is a risk of electrical shock from lightning.
- Do not use a phone in the vicinity of a gas leak.
- To reduce the risk of fire, use only 26 AWG or larger telephone line cord.
- This product must be disconnected from power source and telephone network interface when servicing.

Package Contents:

- One MVP130 or MVP130-FXS unit
- One power cord
- One Command Cable (DB25-to-DB9 connectors)
- One RJ-11 phone cord
- One printed *Cabling Guide*
- One MultiVOIP CD containing software and user documentation.

Quick Hookup for MVP130/130-FXS

- Connect the power cord supplied with your MultiVOIP to the power connector on the back of the MultiVOIP and to a live AC outlet.
- Connect the MultiVOIP to a PC by using the RJ-45 (male) to DB-9 (female) cable.
- Connect a network cable to the **ETHERNET** connector on the back of the MultiVOIP. Connect the other end of the cable to your network.
- Connect one end of an RJ-11 phone cord to the **FXS/FXO** connector on the back of the MultiVOIP. Connect the other end to the device or phone jack.
