FaxFinder Easy to Use, Easy to Sell!

As an AVAYA Business Partner, E2E Technology is solely dedicated to the AVAYA product line focusing on the Small to Medium Business (SMB) sector. E2E Technology strives to place its clients in the latest technology, and to that end they put into practice what they sell. In utilizing the Multi-Tech FaxFinder™ fax server at their office, they've found that it completes their IP Office Unified Messaging package. Since then, they have been recommending it to their clients.

The FaxFinder fax server allows you to receive faxes wherever you are as e-mails and send faxes from any application that can print. It provides distributed faxing capabilities, over a WAN, from a corporate office to small remote offices as well as to field sales people. In addition, it provides secure, convenient faxing for LAN users offering a high degree of privacy for both the sender and recipient.

"WOW! All I can say is WOW!" exclaims Andrea Bacarisse, CEO of E2E Technology. "Our FaxFinder fax server definitely completes our IP Office Unified Messaging package! It is so easy to install; our IP Office technician had the FaxFinder programmed and running within an hour. How easy is that?"

E2E Technology connected a 2-port FaxFinder fax server directly to two analog ports on their AVAYA IP Office phone system. The unused numbers from the IP Office DID lines are used for fax numbers, providing employees with their own individual fax number. When a call is received, the IP Office converts the number into DTMF tones and sends it to the fax server. The fax server answers the call, receives the fax, converts it to a TIFF file, attaches it to an e-mail, and sends it to the correct recipient. Once received, users can view, print or forward the fax as an e-mail to another e-mail user.

E2E Technology uses their FaxFinder fax server daily. All faxes are easily stored on the users' desktops or quickly forwarded to other team members through Outlook. No more wasted paper, toner, or time!

"Within a month, I've proposed three FaxFinders, sold one and have two more closing," said Bacarisse. "What an affordable solution which works as promised! Thank you Multi-Tech."

FaxFinder

- Sends, receives and routes faxes to/from the desktop
- Receive faxes as e-mails and send from any application that can print
- Distributed fax solution for remote offices and field sales people
- Secure, convenient faxing for LAN users
- Completes unified messaging solutions

E2E Technology, as an AVAYA Business Partner, is solely dedicated to the AVAYA product line focusing on the Small to Medium Business (SMB) sector. E2E Technology employs two IP Office Implementation Certified technicians who also hold the Avaya Certified Associate (ACA) credentials. In addition, E2E Technology houses three IP Office Sales Certified personnel. The AVAYA Partner ACS and Merlin Magix systems round out E2E Technology's communications systems portfolio. E2E Technology specializes in voice/data integration and strives to place its clients in the latest technology.
