

# Cellular Voice Back-up for Your PBX

*During times of emergency, establishing communications with the outside world is critical. Multi-Tech has a solution to bridge your PBX to the cellular network providing an alternate route during a disaster.*

## Keep Your Business and Customers Connected.

The CallFinder® cellular gateway provides an easy, inexpensive back-up solution for PSTN failure, including emergency 911 service, and offers a primary voice network during disaster situations. Meet your company's disaster planning and business continuity initiatives with a simple and affordable solution that works with your existing phone system.

## Use it for Everyday Business Communication.

In addition, the CallFinder gateway provides toll-free calls to other cellular phones and can serve as a primary voice network for remote locations. With such attractive pricing for long distance charges on cellular service plans, the CallFinder gateway is advantageous for use in everyday business communications.

## So, What are You Waiting For?

Enhance your voice network today, and gain phone system continuity and cost savings that will go straight to your bottom line. Give us a call at **Reseller's phone number**. Let us put Multi-Tech to work for you today!
