

Allworx Completes Unified Communications Solutions Offering with FaxFinder Fax Server

SMBs with Aging Phone Systems Can Affordably Upgrade with Allworx & Multi-Tech's Combined Solution

Allworx has a cost-effective solution for small to mid-sized companies looking for an affordable way to upgrade their aging (TDM) PBX and key phone systems. In addition to benefitting from the updated features of a new system, businesses can substantially improve their productivity while saving on-going monthly costs.

Allworx develops state-of-the-art phone and network systems by integrating three essential business operations into one simple and affordable system: a feature-rich phone system, advanced IP phones and powerful software features. Completing its Unified Communications offering, Allworx systems can now support a direct fax solution.

Customers can now directly connect a Multi-Tech FaxFinder® fax server to an FXS port on an Allworx system and route faxes directly to users as PDF or TIFF e-mail attachments. With the addition of the FaxFinder, a small to mid-sized business can afford to provide the CEO, President, CFO, COO, Human Resources and others with virtual private fax lines. Because faxes are delivered directly to the user's e-mail box, it offers a high degree of security for both the sender and the recipient.

The Multi-Tech/Allworx solutions work in tandem providing additional benefits to customers. "With Allworx 7.1 server software, we can additionally pass DID digits to the Multi-Tech server that allow individual fax mailboxes for each employee, significantly increasing its functionality to our customers," said Jeff Pink, Programs Solutions Director, Allworx. "The incorporation of DID dialing strings allows each individual employee to have their own personal and confidential fax mailbox, as well."

Solution Benefits:

- Affordable and seamless way to upgrade phone systems
- Increased productivity and cost-savings
- Completes the Unified Communications solution

Solution Components:

- Multi-Tech FaxFinder fax server
- Allworx System 7.1

"With Allworx 7.1 server software, we can additionally pass DID digits to the Multi-Tech server that allow individual fax mailboxes for each employee, significantly increasing its functionality to our customers."

- Jeff Pink, Programs Solutions Director,
Allworx

Multi-Tech FaxFinder Fax Server

The FaxFinder fax server is a turnkey solution that connects to an analog port(s) of a PBX capable of DID to DTMF conversion. It converts faxes to PDF or TIFF files allowing you to send faxes from any application that can print and receive faxes as e-mails, wherever you are. The solution provides distributed faxing capabilities, over a WAN, from a corporate office to small remote offices as well as to field sales people. In addition, it provides secure, convenient faxing for LAN users offering a high degree of privacy for both the sender and recipient. The FaxFinder offers web services API for integration with third party applications, up to 2 GB of storage for incoming/outgoing faxes, direct access to Microsoft® Outlook® address book, secure communication when employing web form, and a web services API and web management interface. They can also archive inbound faxes to shared network storage and automatically prints incoming faxes (print on receive feature).
