

Esker

Comprehensive, Multi-platform Fax Solution

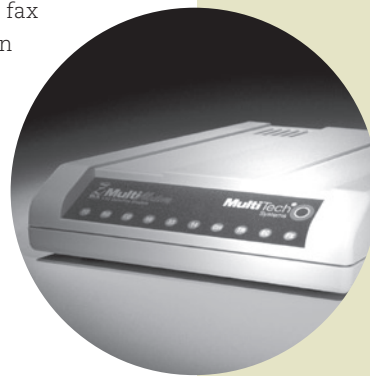

Any business automating its fax transmission, whatever its size, needs to be able to rely on a robust fax server as well as the rock-solid performance of a fax modem. Esker VSI-FAX is a robust multi-platform fax server that is complemented nicely by the reliability and high connect rates found in the Multi-Tech MultiModem® family. Esker VSI-FAX server and Multi-Tech modems share the same philosophy of quality, standards and robustness required by today's mission-critical business applications.

Esker VSI-FAX is a comprehensive, multi-platform fax solution for both small and large businesses that enables faxing of any document from any application running on Linux, Unix, or Windows. VSI-FAX delivers a server-based solution that automates all your critical business applications and communications directly with the outside world by fax-enabling desktops and fax-automating processes that normally require printing, manual faxing, and postage. The VSI-FAX Integrator's ToolKit helps systems integrators, Value Added Resellers (VARs), and IT professionals to integrate fax into any application, enabling faxing of any document from any application — automatically.

VSI-FAX is compatible with the MultiModem® II, MultiModem® ZBA and MultiModem® ZDX modem lines as well as the MultiModem ISI modem cards. The MultiModem ZBA V.92 modem is particularly interesting when combined with Esker VSI-FAX because of its high upload speeds, support of Super G3 V.34 fax speeds, enhanced fax features and global certifications.

Super G3 V.34 fax and Multi-Tech's Error Correction Mode provide significant performance and reliability enhancements over previous fax standards. V.34 sends and receives faxes at 33.6K, more than double the speed of the V.17/14.4K fax standard. And, Error Correction Mode adds reliability while increasing performance of fax transmissions.

"Multi-Tech's fax enhancements increase the performance of the modem to levels previously only found in more expensive dedicated fax boards and machines," explains Hugo Embert, Esker VSI-FAX Product Manager. "This, and the fact that the MultiModem ZBA is certified for use in all the countries where VSI-FAX is distributed, makes it the perfect complement."

MultiModem ZBA and VSI-FAX

Solution Benefits:

- Server-based fax solution
- Fax enables desktops
- Fax automates processes
- Super G3 V.34 Fax
- Global approvals

“ Multi-Tech's fax enhancements increase the performance of the modem to levels previously only found in more expensive dedicated fax boards and machines. ”

- Hugo Embert, Esker VSI-FAX Product Manager.

Multi-Tech MultiModem ZBA

The MultiModem ZBA business modem supports remote configuration for centralized setup and control, as well as callback security making it the modem of choice for business applications. The V.92/56K models provide an increase in upload speeds and quicker connect times, V.34/33.6K fax and Error Correction Mode, which reduces fax transmission time by more than half when compared to traditional fax modems. In addition, MultiModem ZBA business modems are globally approved for use in many countries around the world. This means one model can ship virtually anywhere.

MultiModem ZBA Features:

- V.92/56K download speeds and 48K upload speeds when connecting with V.92 servers
- Dial-up and 2-wire leased line support*
- V.44 compression improves data throughput rates
- Class 1.0 and Class 2.1 faxing at speeds to V.34/33.6K bps (Super G3)
- Error Correction Mode (ECM) provides fast and reliable fax transmissions
- U.S. Caller ID reporting
- Remote configuration for centralized setup and control
- Callback Security for network security and reduced telephone toll charges**
- Globally approved models for use in many countries worldwide
- Country localization kits available with power cords, phone cords and telco adapters
- Small footprint and stackable design
- Flash memory for easy updates
- RS-232 or USB cable included
- Ten-year warranty

* USB model dial-up only.

** RS-232 model only.

Model No.	Description
MT5634ZBA-V92	V.92 Data/Fax World Modem
MT5634ZBA-V-V92	V.92 Voice/Data/Fax World Modem
MT5634ZBA-USB-V92	V.92 Data/Fax World Modem

Esker VSI-FAX

Esker VSI-FAX provides a comprehensive, multi-platform fax solution for both small and large businesses that enables faxing of any document from any application running on Linux, Unix, or Windows®. Esker VSI-FAX delivers a comprehensive server-based solution that fax-automates all your critical business applications and communications. By employing Esker VSI-FAX integration technology to eliminate inefficient paper-centric communications and processes, businesses can substantially increase productivity and reduce costs.

- Minimize long distance charges through least cost routing, call batching, and fax scheduling
- Receive all faxes automatically and securely on the server and/or desktop
- Account for all fax expenditures through cost code tracking
- Integrate seamlessly with third-party applications — ideal for OEMs
- Centralized management of all inbound and outbound faxing
- Fully scalable fax server software
- SCO UnixWare®7 NonStop® Clusters Support
- Additional APIs: including integration from Visual Basic, Visual C++, C#, JavaScript, and Visual Basic Script
- MMC fax administration
- LDAP support
- Automatic routing through DNIS, DID, and DTMF
- Native file imaging (.txt, .pcl, .pdf, .doc, .xls, .ppt, .rtf, and PostScript). (.rtf, .doc, .ppt, and .xls are not supported in Unix/Linux environments)
- Fax merge from Microsoft Office 2000, StarOffice, WordPerfect, and Lotus SmartSuite HP Digital Sender compatibility

About Esker

Esker is the intelligent document delivery leader. With software and hosted delivery services to automate every phase and every type of document delivery, Esker helps organizations streamline manual, paper-intensive business processes and automate the flow of documents into, within and outside the organization.
