

# Engineering, Design and Manufacturing

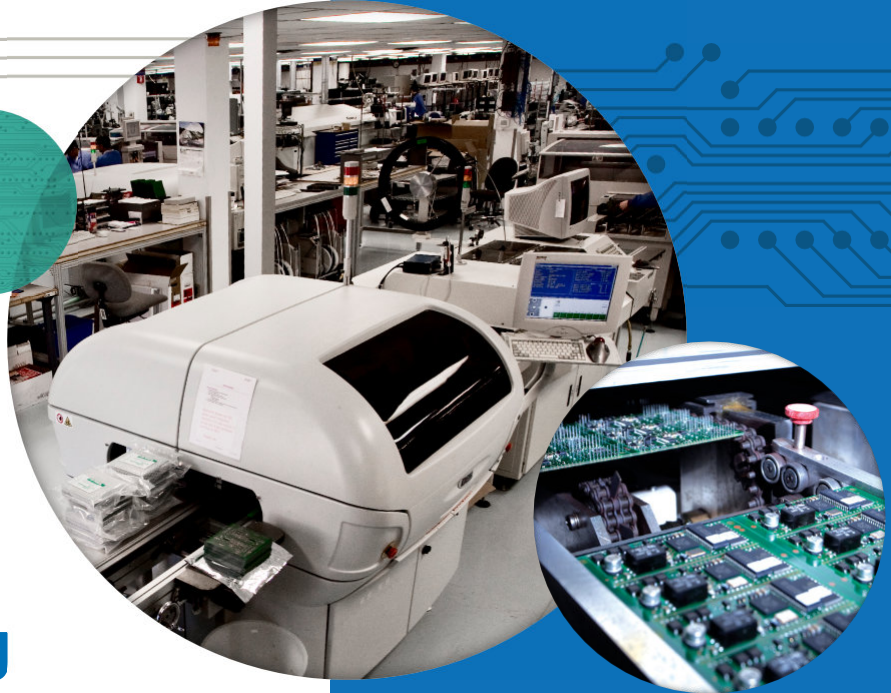

Delivering custom designed solutions for over 20 years.

MultiTech is the ideal design and build partner for mid-to-large scale customers requiring reliable, innovative support for new product development or design optimization and IoT implementation of existing products.

Companies who require manufacturing capacity without the costly overhead will benefit from our high-volume purchasing power and our low-cost manufacturing sources around the world.

- Purpose built solutions
- Custom ASIC development
- Vertically integrated with geographically diverse manufacturing base

For additional information, contact: [sales@multitech.com](mailto:sales@multitech.com)

## Core Competencies

- Low power embedded system design
- Electromechanical system integration
- One Stop Shop
- Enhanced speed to market driven by integrated design/manufacturing teams
- Complete control of supply chain ensures consistent supply and confidentiality
