

How MultiTech Makes the World Smarter

We design, develop and deliver solutions that incorporate the latest disruptive technology. Our systems sense inputs and activate devices while collecting and communicating data, which provides your customers with truly innovative, value-added solutions.

MultiTech is the premier supplier of electro-mechanical and IoT systems in North America. We innovate and develop technology to make equipment smarter.

We optimize customer's device design & add connectivity.

We custom design the sensor & wireless module.

You connect to the cloud via existing gateways or by using a direct cellular connection.

CELLULAR
OR
GATEWAY

BLE / LORA / SUB GIG

We custom design apps and dashboards.

LTE-M
NB-IOT

Authentication and Sensor Technology

Providing cost-effective, custom ID/Tagging solutions for difficult or specialized markets as well as general RFID/NFC solutions.

- Rugged, IP67-rated and chemically-resistant tags suitable for near-contact authentication
- Patented active tagging that prevents corrosion while transferring data and power
- Low-cost readers suitable for high volume applications
- Passive and Active IR (PIR, AIR)
- Time of flight
- Vibration and acceleration monitoring
- Capacitive sensors
- Ultrasonic sensors
- Strain Gauge
- Temperature
- Pressure

Complete “End-to-End” IoT Solutions

Benefiting applications where labor productivity and cost are a priority.

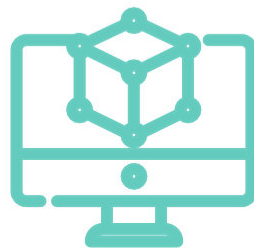

- MultiTech’s IoT solutions optimize performance and cost of the hardware, communication technology, and cloud-based application.
- MultiTech’s hardware solutions coupled with our backend data analytics allow us to provide actionable information from large amounts of data.
- In house App (iOS & Android) and backend development ensure smooth integration and speed to market.

Engineering, Design and Manufacturing

Companies who require manufacturing capacity without the costly overhead will benefit from our high-volume purchasing power and our low-cost manufacturing sources around the world.

- Low power embedded system design
- Electromechanical system integration
- “One Stop Shop”
- Enhanced speed to market driven by integrated design/manufacturing teams
- Complete control of supply chain ensures consistent supply and confidentiality

*At MultiTech,
we help our
customers grow
and create
differentiated
technology solutions
by staying true to
our core values
of innovation,
quality and
timeliness to
market.*
