12/31/2025: Anticipated 3G-HSPA+ network sunset.

Australia:

Telstra 2G/3G Sunset Schedule:

3G network sunset
2100Mhz turndown is occurring now. Full or partial geographic closure of 850Mhz 3G may occur any time after 2020, but would be unlikely before 2022. "So somewhere between 2020 and 2030 the 3G network will be shut down but precisely when has not yet been decided"
<https://www.m2mone.com.au/m2m-one-june-2018-newsletter/>

APAC:

Japan: 2G is partially shut down. There is no clear announcement for 3G sunset

Korea: 2G is partially shut down. SKT CDMA network is still available. There is no clear announcement for 3G sunset

Taiwan: 2G was sunset on 12/31/2016. 3G sunset planned for 12/31/2018.

EU:

Vodafone: Will not switch off 2G until at least 2025
